

## Communion on the moon

Dennis Coday | Jul. 21, 2009 NCR Today

Astronaut Buzz Aldrin was the first human to witness how liquid behaves in the weak gravitational field of the moon -- but this was no science experiment.

This was a believer giving thanks to God for an extraordinary adventure.

Thus begins the story by Kay Campbell of Religion News Service about a Communion on the moon:

[The lunar communion service](#) [1].
