

Valentine's Day Preach-in/Teach-in on Climate Change

Rich Heffern | Feb. 3, 2010 NCR Today

Interfaith Power & Light coalitions and partner congregations around the country will be making climate change the subject of their worship services on Valentine Day's weekend, February 12-14.

Your parish or congregation can get involved by sending Valentine postcards to your legislators on "loving our neighbors by caring for creation" -- specifically in terms of passing strong climate legislation. When you sign up for the Valentine Day preach-in, you receive materials to help you educate or prepare a sermon for the second week of February. Visit [Interfaith Power & Light](#) [1]
