

## Smart ways to save gas

Rich Heffern | Mar. 4, 2011 Eco Catholic

The turbulence in the Middle East shows no signs of letting up, which means that we can expect the volatility in gas prices to continue as well. Oil is already at \$100 a barrel. Gas prices could once again hit \$4 a gallon this summer.

Deron Lovaas's blog on the Natural Resources Defense Council Web site features [seven smart ways to save gas](#) [1]right away.
