

Wieseltier Tackles the "Darwinist Mob"

Michael Sean Winters | Mar. 8, 2013 | Distinctly Catholic

No one has done a better job exposing the hubris of scientism, as opposed to science, than Leon Wieseltier. So, it is unsurprising that he has decided to take on the "Darwinist mob" that has attacked a new book by Thomas Nagle. I do not share Wieseltier's sentiments about heresy, but his phrase "the soulfulness of reason" is more than compensation.

You can find his essay [here](#) [1].
