

What's Wrong With Planned Parenthood?

Michael Sean Winters | Apr. 1, 2013 Distinctly Catholic

I am not shy about criticizing the libertarianism of the right. Here is an instance of goofy libertarianism on the left, an official with Planned Parenthood who just can't bring herself to state that a child born alive after a botched abortion is a patient deserving medical attention. Shocking and sad at the same time. This is what happens when you convince yourself that the unborn child is not really a child and that only the volition of the mother should count.
