

The Christian Case for Vegetarianism

Michael Sean Winters | Oct. 11, 2013 Distinctly Catholic

My friend Charles Camosy, theology professor at Fordham, has a new book out that examines the moral implications of the way our culture processes its food, especially those processes which inflict cruelty on animals. Camosy has penned [an op-ed that just appeared in the Seattle Times](#) [1] that captures some of the arguments he makes in the book. He called the other night to alert me to an [upcoming speaking gig](#) [2] in the DC area at which he will discuss his book. I was unembarrassed by the fact that as we spoke, I was turning a couple of racks of baby back ribs on the grill. I do not share Camosy's convictions, and add this to the list of my many sins. But, his articles and books are always thought-provoking so I have no hesitancy in commending both to Distinctly Catholic's readers.
