

Gov. O'Malley on the Environment

Michael Sean Winters | Dec. 19, 2013 Distinctly Catholic

Those of us who live near the Chesapeake Bay know what a great natural treasure the Bay is. Recently, the Governor of Maryland visited Brazil where Guanabara Bay faces similar environmental challenges and wrote about the visit at his blog [here](#) [1]. There is a deeply religious sense to his comments as well as a ton of statistics. Regular readers will know that I am a fan of Gov. O'Malley and here is another reason why I think that confidence is justified.
